Thrustmaster Ferrari SF1000 Wheel Add-on upon a TS-WX Racer wheel base

While it's quite bewildering to use at first (as I said, read the manual), the SF1000 is the perfect cherry atop an F1 enthusiast's dream racing rig. It feels incredible to use, looks phenomenal and achieves what it set out to do.

More importantly, it makes you feel as if you're behind the wheel of a real Ferrari F1 car. It looks so convincing when it's off the rig, you would be forgiven for thinking I nipped to the Silverstone pits and pinched this off Charles...

The Thrustmaster SF1000 Edition Wheel Add-on is available from today in APAC regions, with worldwide sales starting 26th August 2021. It's compatible with the Thrustmaster TS-PC Racer, T-GT Servo Base, TS-XW Servo Base, TX Racing Wheel Servo Base and T300 Racing Wheel Servo.

Full disclosure: A wheel was provided by the manufacturer for review purposes.
